

Eco-Tec launches Spanish language website

August 2013, Pickering, Ontario – Eco-Tec Inc., global supplier of industrial water treatment and chemical recovery systems, officially launched its website in Spanish to better serve its client base throughout Latin America, Europe, and other sectors worldwide.

Spanish-speaking prospects can now learn more, at <http://eco-tec.com/es>, about Eco-Tec's ion exchange (Recoflo[®]) and micro media filtration (Spectrum[™]) products, which provide clients with improved performance, economy, and reliability in their operations.

"We're now exporting to more than 60 countries, including a number of very important Spanish-speaking markets," said Dr. Phillip (Rocky) Simmons, Eco-Tec President & CEO. "Accurately translating the benefits of our technology and services online into Spanish is an exciting step."

Eco-Tec's new Spanish website – serving growing markets throughout Latin America and Europe – is now available.

Eco-Tec's Spanish site is based on the format of its English website, which features smooth, simple navigation; an array of photos and graphics; and many useful technical articles and white papers.

Switching between languages throughout the website is easily done by clicking on the country flags found at the top and bottom of web pages.

To learn more, visit (in Spanish) www.eco-tec.com/es or (in English) www.eco-tec.com.

About Eco-Tec - www.eco-tec.com

Backed by over 40 years of manufacturing expertise, Eco-Tec designs, develops, and builds equipment for industrial water treatment and purification of chemicals and gases. Our systems incorporate advanced, proprietary designs that provide clients with improved performance, economy, and reliability in their operations, while facilitating environmental responsibility. In business since 1970, Eco-Tec has supplied over 2,000 systems to more than 60 countries.
